

Uprooting Trees | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Uprooting Trees

| | | |
|-------------------|--------|--------|
| Business Name: | ABN: | SWMS# |
| Business Address: | | |
| Contact Person: | Phone: | Email: |

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

| |
|------------|
| Full Name: |
|------------|

| | | |
|------------|--------|-------|
| Signature: | Title: | Date: |
|------------|--------|-------|

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.

| | | |
|------------|--------|--------|
| Full Name: | Title: | Phone: |
|------------|--------|--------|

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

| | |
|--|--|
| <input type="checkbox"/> involves a risk of a person falling more than 2 meters | <input type="checkbox"/> is carried out on or near pressurised gas mains or piping |
| <input type="checkbox"/> is carried out on a telecommunication tower | <input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines |
| <input type="checkbox"/> involves demolition of an element of a structure that is load-bearing | <input type="checkbox"/> is carried out on or near energised electrical installations or services |
| <input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure | <input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere |
| <input type="checkbox"/> involves, or is likely to involve, disturbing asbestos | <input type="checkbox"/> involves tilt-up or precast concrete |
| <input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse | <input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor |
| <input type="checkbox"/> is carried out in or near a confined space | <input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant |
| <input type="checkbox"/> is carried out in/near a shaft or trench deeper than 2m or tunnel involving use of explosives | <input type="checkbox"/> is carried out in areas with artificial extremes of temperature. |
| <input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning. | <input type="checkbox"/> involves diving work. |

ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

| RISK MATRIX | | | | | | | | | |
|----------------|---------------|---------------|---------------|------------|--------------|----------------|-----------------------------------|--|--|
| LIKELIHOOD | INSIGNIFICANT | MINOR | MODERATE | MAJOR | CATASTROPHIC | SCORE | ACTION | HEIRARCHY OF CONTROLS | |
| ALMOST CERTAIN | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4 ACUTE | | | <p>Elimination Remove the hazard.</p> <p>Substitution Replace the hazard.</p> <p>Isolation Isolate People from the hazard</p> <p>Engineering Isolate the hazard.</p> <p>Administrative Change the work.</p> <p>PPE</p> | |
| LIKELY | 2 MODERATE | 3 HIGH | 3 HIGH | 4 ACUTE | 4 ACUTE | 4A ACUTE | DO NOT PROCEED | | |
| POSSIBLE | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 4 ACUTE | 3H HIGH | Review before work starts. | | |
| UNLIKELY | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 4 ACUTE | 2M MODERATE | Ensure control measures in place. | | |
| RARE | 1 LOW | 1 LOW | 2 MODERATE | 3 HIGH | 3 HIGH | 1L LOW | Monitor and keep records | | |

Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

| PERSONAL PROTECTIVE EQUIPMENT (PPE) | | | | | | | | | | | |
|---|--------------------------|--------------------------|--------------------------|--------------------------|----------------------------|---------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|----------------------------|
| Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable). | | | | | | | | | | | |
| FOOT PROTECTION | HAND PROTECTION | HEAD PROTECTION | HEARING PROTECTION | EYE PROTECTION | RESPIRATORY PROTECTION | FACE PROTECTION | HIGH-VIS CLOTHING | PROTECTIVE CLOTHING | FALL PROTECTION | SUN PROTECTION | HAIR/JEWELLERY SECURED |

| | | | | | | | | | | | |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR |
|---------------------|--|--------------|---|---------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Slips, trips and falls, Contact with overhead powerlines | 3H | <ul style="list-style-type: none"> - Conduct a site inspection to identify potential slip, trip, and fall hazards such as uneven ground, debris, and wet surfaces. - Clear the work area of unnecessary materials and equipment to minimise tripping risks. - Ensure all personnel wear appropriate non-slip footwear suitable for outdoor and uneven terrain. - Establish clear pathways in the work area with visible signage to guide workers safely around hazards. - Provide adequate lighting in low visibility areas to reduce the risk of slips and trips. - Develop a communication plan to inform team members about identified hazards and prevention measures. - Install physical barriers or warning signage around known trip hazards that cannot be removed immediately. - Check weather conditions prior to commencing work and postpone operations if conditions increase slipping risks. - Identify the location of overhead powerlines before starting any tree uprooting activities. - Maintain a safe working distance from overhead powerlines according to local regulations and guidelines. - Use non-conductive tools and equipment when working near overhead powerlines to avoid contact. - Assign a spotter to monitor the proximity of plant machinery and workers to overhead powerlines at all times. - Train workers on the risks associated with overhead powerlines and how to operate safely around them. - Implement an emergency response plan that includes steps for dealing with incidents involving contact with powerlines. | 1L |
| 2. Site Assessment | Fallen or hanging branches, Inadequate equipment | 3H | <ul style="list-style-type: none"> - Conduct a thorough site inspection to identify any fallen or hanging branches before commencing work. - Clearly mark and isolate the area around dangerous branches to prevent unauthorised access. - Implement a communication plan to inform all personnel on-site about identified hazards. - Use signage to warn workers and visitors of potential risk areas due to unstable or hazardous branches. - Utilise pole saws or pruners to safely remove smaller fallen or hanging branches from a distance. - Maintain a safe distance from falling branches, ensuring workers are outside of the drop zone at all times. - Ensure all equipment is regularly maintained and inspected prior to use for efficiency and safety. - Provide adequate personal protective equipment (PPE) such as helmets, gloves, and eye protection for all team members. | 2M |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR |
|---------------------|--|--------------|---|---------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| | | | <ul style="list-style-type: none"> - Train workers on proper techniques and procedures for safely dealing with fallen or hanging branches. - Utilise spotters to help observe and guide operations when branches are being cleared or removed. - Evaluate weather conditions and delay work if high winds or adverse conditions increase hazards from hanging branches. - Deploy appropriate machinery like cranes or cherry pickers for reaching and securing larger branches safely. - Develop an emergency response plan that addresses potential injuries from branch removal activities. | |
| 3. Tree Assessment | Unexpected tree fall, Branches under tension | 4A | <ul style="list-style-type: none"> - Conduct a thorough visual inspection of the tree and surrounding area to assess stability and identify branches under tension. - Use proper personal protective equipment including helmets, gloves, and high-visibility clothing, at all times. - Employ experienced arborists trained in recognising signs of stress or disease that could affect tree stability. - Establish a clear exclusion zone around the tree with warning signs to prevent unauthorized personnel access. - Use tools such as binoculars or drones to inspect hard-to-reach areas for hidden hazards or dangerous branch configurations. - Install appropriate supporting equipment such as ropes, braces, or chains to stabilise sections identified as hazardous before proceeding with removals. - Develop and communicate a clear plan for tree felling, involving all team members in understanding potential risks and emergency procedures. - Ensure regular radio or verbal communication among the team to coordinate movements and maintain situational awareness. - Avoid working near power lines, ensuring compliance with any local regulations regarding minimum safe distances. - Prepare an escape route free from encumbrances so workers have a clear path to safety if conditions become unstable. | 2M |
| 4. Equipment Check | Faulty tools, Improper use of equipment | 3H | <div></div> <div></div> <div></div> <div></div> <div></div> <div></div> | 1L |

SAMPLE

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

| | | |

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS |
|--|-------------------------------------|----------|
| The company details have been entered, including the project name and address. | <input checked="" type="checkbox"/> | |
| All relevant personnel consulted during the development of the SWMS. | <input checked="" type="checkbox"/> | |
| Name, signature, position and date signed of the person approving the SWMS. | <input type="checkbox"/> | |
| Specific personnel and qualifications, experience is noted in the SWMS. | <input checked="" type="checkbox"/> | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | <input checked="" type="checkbox"/> | |
| Adequate risk assessment of any identified hazards has been completed. | <input checked="" type="checkbox"/> | |
| Foreseeable hazards are identified and documented for each step. | <input checked="" type="checkbox"/> | |
| Any hazards listed in any site risk assessments have been added to the SWMS. | <input checked="" type="checkbox"/> | |
| SWMS initial risk (IR) column as well as residual risk (RR) column completed. | <input checked="" type="checkbox"/> | |
| Check control measures added to the SWMS are the most effective solutions. | <input checked="" type="checkbox"/> | |
| Responsible person is assigned and listed on the SWMS for the implementation of control measures. | <input checked="" type="checkbox"/> | |
| Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc. | <input checked="" type="checkbox"/> | |
| SWMS identifies plant and equipment to be used. | <input checked="" type="checkbox"/> | |
| Details of inspection checks required for any equipment listed are noted on the SWMS. | <input checked="" type="checkbox"/> | |
| Describes any mandatory qualifications, experience, training or skills required to perform the work. | <input checked="" type="checkbox"/> | |
| Applicable personal protective equipment is selected on the SWMS. | <input checked="" type="checkbox"/> | |
| Reflects and documents any legislative references and/or Australian Standards. | <input checked="" type="checkbox"/> | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | <input checked="" type="checkbox"/> | |
