Using Tipper Trucks	SAFE WORK METHOD S	TATEMENT (SWMS)							
TAS	K OR ACTIVITY: Using Tipper Tr	ucks							
Business Name:		ABN:	SWMS#						
Business Address:									
Contact Person:	Phone:	E ail:							
THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCAN OF THE ROJECT									
Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or under ting (Pt-U) is required to encreate that a safe work method statement (SWMS) is prepared before the proposed work starts.									
Full Name:									
Signature:		Title:	Date:						
Details of the person(s) responsible for ensuring implementation, monitoring the	compliance of the SWN, was well as re	views and modifications of the SWMS.							
Full Name:		Title:	Phone:						
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE						
Safety meetings or toolbox talks will be sched, ed in according with regislative requirements to first identify any site hazards, and the to further take steps to either eliminate or contained be hazard.									
If an incident or a near miss occurs, all work must stude under the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.									
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.									
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips, Trips and Falls, Contact with Electricity	ЗН	 Provide clear and unobstructed access trand from the work area. Ensure all pathways are well-lit, especially uring each morning or late evening operations. Conduct a site inspection to identify any under ground or obstacles that may cause trips. Place barriers or signage a und temporary haveds such as cords or hoses that need to be in the walking path. Wear appropriate PPE, cludik non-slip footvear. Keep the vark area clear and tidy chall thes; promptly address any spills. Usable ulated rolls are equipment view morking near electrical sources. Main his safe mance from overhead power lines when positioning and operating the tipper truck. Ensure the upper true's electrical system is checked and properly maintained to prevent electrical faults. Develd and anomumicate clear procedures for reporting hazards related to slips, trips, falls, and entrical sks. Trains and on emergency response procedures should an electrical incident occur. Regularly review and update safety protocols to comply with current regulations and best practices. 	2М
2. Vehicle Inspection	Contact with Moving Parts, Reaction to Chemicals	ЗН	 Conduct a pre-start inspection to identify any potential defects or issues. Ensure that all moving parts are securely guarded to prevent accidental contact. Wear appropriate PPE, including gloves and safety glasses, to protect against chemical exposure. Follow manufacturer guidelines for inspection and maintenance procedures. Verify that the vehicle's braking system is functioning correctly. Check all fluid levels including oil, coolant, hydraulic, and brake fluids. Inspect tyres for proper inflation, tread depth, and signs of damage. Ensure that all lights, horns, and warning signals are operational. Use spill containment materials when handling chemicals to prevent environmental contamination. Review Safety Data Sheets (SDS) for all chemicals to be aware of proper handling methods. Ensure that tools and equipment used during inspection are in good condition and properly maintained. Keep a fire extinguisher nearby when inspecting fuel systems or other flammable materials. Confirm that the hydraulic system is free from leaks and properly secured. 	2М

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.	\boxtimes	
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\boxtimes	
Check control measures added to the SWMS are the most effective sections.	\boxtimes	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	\boxtimes	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\boxtimes	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\boxtimes	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
