| Business Address: | | | |
| Contact Person: | Phone: | E ail: | |
| THIS SAFE WORK METHOD | STATEMENT IS APPRO | THE PC. OF THE ROJECT | |
| Under the Work Health and Safety Regulation (WHS Regulation), a person condu the proposed work starts. | | required to entry that a safe work method | statement (SWMS) is prepared before |
| Full Name: | | | |
| Signature: | | Title: | Date: |
| Details of the person(s) responsible for ensuring implementation, monitoring | compliance of the SWN, as well as re | eviews and modifications of the SWMS. | |
| Full Name: | | Title: | Phone: |
| ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS HAVE THE FOLLOWING COMMUNICATED | NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF | IEL WHO HAVE BEEN CONSULTED AND (THIS SWMS | COMMUNICATED TO IN THE |
| Safety meetings or toolbox talks will be schedued in according with regislative requirements to first identify any site hazards, and the to further take steps to either eliminate or contail each hazard. | | | |
| If an incident or a near miss occurs, all work must stude under the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

|---|--|-----------------|--|------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Slips, trips and falls, skin exposure to contaminated water | 2М | Conduct a site-specific risk assessment brane starting any work. Use non-slip footwear to reduce the risk onlips, tring and falls. Wear appropriate personal protective equipment (PPE) such as gloves, goggles, and waterproof clothing. Establish clear walkways and onfe access routes used the worksite. Install warning on a stand area prone to slips and falls. Provide addictate lighting in areas with provisibility. Ensem that a worke user trained or one correct use of PPE and safety procedures. Set us prives conductrails around hazardous areas to prevent accidental entry. Regularly usect a maintain all work surfaces to ensure they are free from hazards. Implement a oddy system to monitor each other for signs of exposure or fatigue. How en orgency wash stations available for immediate decontamination. Prohibututing, drinking, or smoking in contaminated areas to avoid ingestion of contaminants. | 1L |
| 2. Site Assessment | Exposure to harmful microorganisms, accidental ingestion of contaminated water | ЗН | Conduct a thorough site assessment to identify potential contaminants and their concentrations. Wear appropriate personal protective equipment (PPE) such as gloves, waterproof boots, and respirators. Implement a decontamination procedure for personnel and equipment exiting the site. Use barriers or signs to restrict access to contaminated areas. Employ proper hygiene practices like washing hands and face after exposure. Ensure availability of clean drinking water and prohibit consumption of site water. Provide training on hazard recognition and safe handling procedures for all workers involved. Use engineering controls like containment booms to limit the spread of contamination. Monitor health status of workers routinely to detect any symptoms of exposure early. Have an emergency response plan in place, including first aid measures and contact information of medical facilities. | 1L |
| 3. Personal Protective Equipment Fitting | Inadequate protection, allergic reactions | 2M | - Select PPE that meets Australian Standards for water contamination - Conduct a risk assessment to identify appropriate PPE for specific contaminants | 1L |

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS | |
|---|----------------|----------|--|
| | | | |
| The company details have been entered, including the project name and address. | | | |
| All relevant personnel consulted during the development of the SWMS. | \boxtimes | | |
| Name, signature, position and date signed of the person approving the SWMS. | | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | 7 | | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | | |
| Adequate risk assessment of any identified hazards has been completed. | | | |
| Foreseeable hazards are identified and documented for each step. | \boxtimes | | |
| Any hazards listed in any site risk assessments have been added to the Sλ. S. | \boxtimes | | |
| SWMS initial risk (IR) column as well as residual risk (RR) column completed. | \boxtimes | | |
| Check control measures added to the SWMS are the most effective sections. | \boxtimes | | |
| Responsible person is assigned and listed on the spiral of the spiral entry of control measures. | \boxtimes | | |
| Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc. | \boxtimes | | |
| SWMS identifies plant and equipment to be | \boxtimes | | |
| Details of inspection checks required for any equipment lister are noted on the SWMS. | \boxtimes | | |
| Describes any mandatory qualifications, experience, ang or skills required to perform the work. | \boxtimes | | |
| Applicable personal protective equipment is selected on the SWMS. | \square | | |
| Reflects and documents any legislative references and/or Australian Standards. | \boxtimes | | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | \boxtimes | | |
