TASK OR A	CTIVITY: Working In Scorching S	Summer Heat	
Business Name:		ABN:	SWMS#
Business Address:			
Contact Person:	Phone:	E qil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVID BY	THE PC VOF TP' ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduthe proposed work starts.			statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:	/// '	Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheded in accordance with agislative requirements to first identify any site hazards, to contain the those hazards and then to further take steps to either eliminate or containing the accordance of the second sec			
If an incident or a near miss occurs, all work must standately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Heat exhaustion, Dehydration	3H	 Conduct a pre-work briefing to educate all curkers about the risks of heat exhaustion and dehydration. Schedule work during cooler parts of the cool, such a early morning or late afternoon, to minimise exposure to high temperatures. Ensure adequate shaded stareas are available near the working site for regular breaks. Mandate frequent breaks in cool shaded areas to be workers time to recover from any symptoms of overheating. Provide any supplies coold drawing wat cand encourage workers to hydrate at regular intervals, even if they unot feel though. Suppose ectrol and as or supplements to help replenish lost nutrients and minerals from sweating. Implying a budge system where workers look out for signs of heat stress in their colleagues. Requir apportate athing such as light-colored, loose-fitting, and breathable fabrics that aid in keeping he biologous. Entire at pendial protective equipment (PPE) is suitable for hot conditions and does not unintered ally increase the risk of heat exhaustion. Install cooling stations with fans or misting systems to provide additional relief from heat exposure. Train employees in recognising symptoms of heat-related illness and the immediate actions to take if they occur. Develop an emergency response plan specifically addressing severe heat-related incidents and ensure all workers are familiar with it. 	2M
2. Equipment Check	Burns from hot equipment, Poor visibility due to heat haze	3Н	 Ensure all equipment is regularly maintained and inspected before use to avoid overheating and related hazards. Provide shaded areas or covers for equipment stored outdoors to reduce direct exposure to the sun. Allow equipment to cool down by scheduling regular breaks in its usage during peak sun hours. Use thermal gloves or protective materials when handling metal surfaces or equipment exposed to high temperatures. Install reflective covers or sun shields on machinery and vehicles to minimise heat absorption. Schedule operations requiring visual precision during early morning or late afternoon to reduce issues caused by heat haze. Implement a buddy system where workers can assist each other in identifying potential visibility issues due to heat haze. 	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Offer training sessions focused on identifying and mitigating risks associated with hot equipment and	RESIDUAL RISK
			poor visibility. - Ensure appropriate signage is in place to warp ployees of hot surfaces or equipment.	
			- Consider alternative methods or equipment and generate less heat if possible, to mitigate risk.	
3. Travel to Site	Vehicle overheating, Poor road conditions due to heat	3H	 Ensure the vehicle's cooling system is fund a pire properly by checking coolant levels and radiator condition before departure. Keep an emergency kit hand a including water, jumer or uses, a flashlight, a first aid kit, and basic tools. Regularly inspect to the sade of ate tread depth and correct tyre pressure to prevent blowouts due to hot surfaces. Avoid driving furing peak seat hour of possible; schedule travel in the early morning or late afternoon. Plates tes and do to be and identify snaded rest stops to give drivers and vehicles periodic relief from intensity at. Limit be an of air anditioning to avoid overheating the vehicle's engine but maintain a comfortable cabin to precipite to juvent driver fatigue. Trains to on recognising signs of vehicle overheating and appropriate responses such as pulling over after an allowing the engine to cool down. Trains to on recognising signs of vehicle overheating and appropriate responses such as pulling over after an allowing the engine to cool down. Utilise sunshades inside the vehicle to reduce internal temperatures when parked, decreasing the load on air conditioning systems when starting back up. Encourage communication among team members using mobile phones or CB radios to notify of any unexpected delays or conditions that may require quick response or adjustments. 	2M
4. Site Assessment	Heat exhaustion, Sunburn	4A		2M

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the child with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.	<u>k</u>	
Adequate risk assessment of any identified hazards has been completed.	\boxtimes	
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the SV 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effective sections.		
Responsible person is assigned and listed on the splenentant of control measures.		
Permit or licenses requirements specified, so n as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.	\boxtimes	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.	\boxtimes
