Contact Person:	Phone:	E ail:	
THE CAFE WORK METHOD	OTATEMENT IO APPROVAD DV	THE POLICE THE COLEGE	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conductive proposed work starts.	acting a business or und bing (Pt U) is	required to element had a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	compliant a of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS IN HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheded in accordance with regislative requirements to first identify any site hazards, to contain the those hazards and then to further take steps to either eliminate or containing the containing the schede steps.			
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Exposure to asbestos, Electric shock from old wiring	3H	 Conduct an asbestos survey prior to the organization of any work in ceilings or subfloors. Engage a licensed asbestos assessor if suspected in terials are and. If asbestos is confirmed, engage a qualified in the stremoval contractor to safely remove and dispose of the material in accordance with national and date regulations. Provide comprehensive training of orall workers on a coording and safely handling materials containing asbestos. Ensure all elemental systems with othe work and are identified. Obtain up-to-date electrical diagrams that indicate using routes and contactions. Implies ent a national for all workers or a feet indicate using routes and contactions. Implies ent a national form of the system to state electrical circuits in the work zone before starting any work. Verificantion was propriate testing equipment. Equilibrium of the system to state electrical circuits in the work zone before starting any work. Verificantion was propriate testing equipment. Equilibrium of the system to state electrical circuits in the work zone before starting any work. Verificantion was propriate testing equipment. Equilibrium of the system to state electrical circuits in the work zone before starting any work. Verificantion was propriate testing equipment. Equilibrium of the system to starting any work. Regula vinsp of the work area for unidentified or incorrectly labelled electrical wires and other hazards. Improve the environmental controls such as HEPA air filtration units when working in potentially pontarior and areas to prevent asbestos fibre dispersal. Improve the environmental controls such as HEPA air filtration units when working in potentially pontarior and areas to prevent asbestos fibre dispersal. Improve the environmental controls such as HEPA air filtration units when working in potentially pontarior and areas to prevent asbestos fibre dispersal. Improve the environment	2M
2. Entry to Subfloor/Ceiling	Falls through ceiling, Animal infestation	4A	 Ensure a pre-entry risk assessment is conducted to identify any potential hazards specific to the particular site. Use only designated access points to enter ceilings or subfloors, ensuring these are stable and secure before entry. Install temporary covers or barriers around open entries to prevent accidental falls when not in use. Provide workers with personal protective equipment (PPE), including hard hats, gloves, and knee pads, to protect against scratches and impacts. Train workers on the safe method of moving within confined spaces, including how to avoid stressing ceiling joists and floorboards. Check the integrity of the surface before stepping onto it; apply body weight gradually to test stability. Implement safe work practices such as keeping three points of contact when moving through tight spaces or above ground level. 	2M

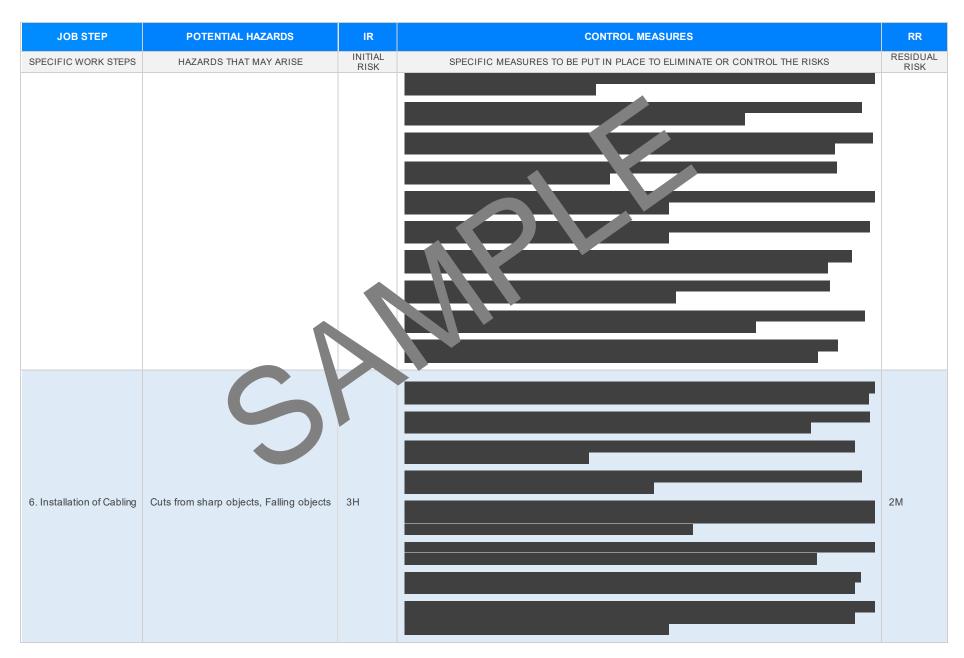

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Utilise crawl boards or suitable crawling equipment over joists in ceilings to distribute weight evenly and prevent falls through weak areas.	
			- Instruct workers to use headlamps or hands-free tuches to ensure good visibility while keeping hands free for balance and work activities.	
			- Conduct regular checks for signs of animal infestation fore allowing entry and organise appropriate pest control measures if needed.	
			- Clearly mark and communicate areas that are usafe due to ragility or other dangers.	
			- Enforce a policy where all to and materials are cure an apported and stored to avoid creating trip hazards.	
			- Maintain compressication all the s between the subfloor/ceiling and those outside to provide quite sistance in equired.	
			- Develop an exergence esponse plan pecifically tailored for incidents in confined ceiling or subfloor space cluding of the procedures and necessary medical aid.	
			- Ensurally als and oterials are organised and stored neatly away from the main workspace to prevent tripping	
			- nduc a thorough inspection of the work area before beginning to identify and remove any existing tripps. In tards.	
			Provide portable lighting solutions to ensure adequate illumination in the workspace, especially in poorly line eas.	
			Use warning signs or barriers around the work area to highlight potential trip hazards to all personnel.	
			- Implement a clean-as-you-go policy where workers are required to keep their immediate work area free of clutter and obstructions during operations.	
			- Provide headlamps for each worker to aid visibility without having to carry additional lighting equipment.	
3. Workspace Setup	Trips over tools, Poor IIs	3H	- Utilise cable management systems such as hooks or ties to secure extension cords and power cables off the floor.	1L
			- Regularly review and adjust the positioning of lights to ensure ongoing sufficient illumination as work progresses.	
			- Train workers on how to set up and maintain a safe workspace, including correct placement and handling of tools and materials.	
			- Schedule regular breaks to allow workers to clean and organise their workspace and reduce the risk of accidents.	
			- Use reflective tape on tools and around the worksite to enhance visibility and awareness of potential hazards.	
			- Ensure that all workers wear appropriate personal protective equipment (PPE) such as slip-resistant shoes to mitigate the risk of trips and falls.	
			- Provide adequate supervision to enforce safety protocols related to workspace organisation and maintenance.

EMERGENCY RESPONSE - CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THE 'S' NTEMANT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties the theoretical with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
TIEMS WHICH MOST BE INCLUDED IN THE SWINS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SV 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effective sections.		
Responsible person is assigned and listed on the splenetation of control measures.		
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.		
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
